

TAKE ACTION TODAY

GET THE FLOOD MITIGATION RESOURCES YOU NEED, ALL IN ONE PLACE.

ABOUT

ReduceFloodRisk.org

Flooding is the most common and widespread of all weather-related natural disasters. Flood losses averaged nearly \$17 billion per year between 1990 and 2018.

It's estimated that for every \$1 invested in flood mitigation, \$6 are saved in post-disaster recovery costs.

With more than 1 million houses in the 100-year floodplain and the rising frequency of flood events across the nation, it is vital that individuals and communities take action today to protect against flooding tomorrow.

ARE YOU A...?

Property owner

Property buyer

Business owner

Renter

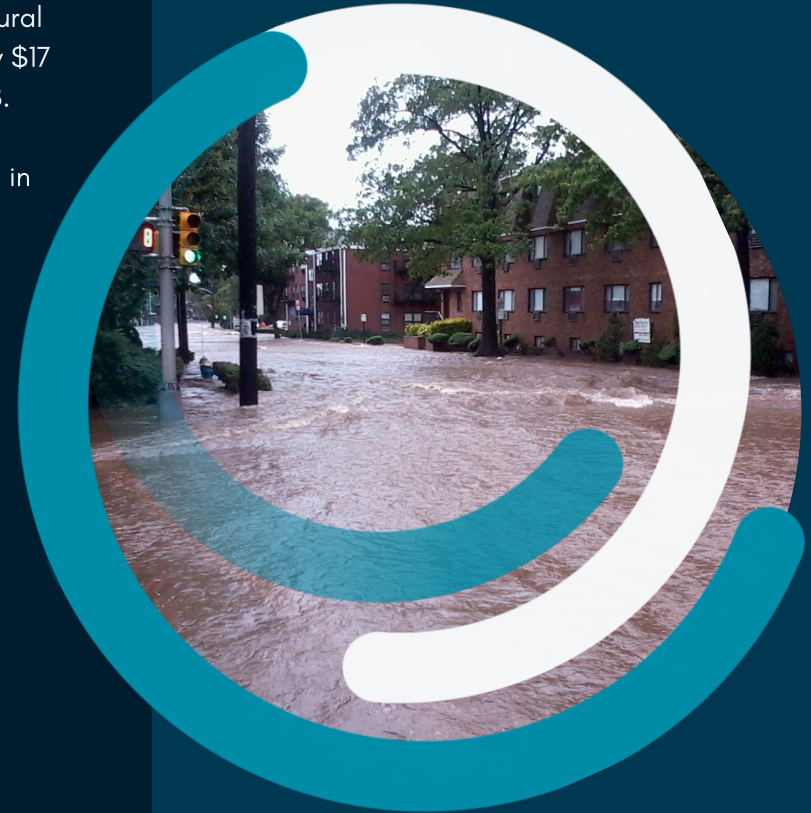

Community association representative

Government official

Real estate professional

Someone who lives in a flood prone area

WE ARE HERE TO HELP!

Reduce Flood Risk

a library of flood mitigation strategies and resources

OUR MISSION

To reduce current and future losses, costs and human suffering caused by flooding.

OUR GOAL

To help property owners and buyers in flood-prone areas identify strategies to reduce their property's risk of flooding.

To connect anyone looking to reduce their flood risk with mitigation information and resources.

HOW WE CAN HELP

PROVIDE FLOOD FACTS

Worried about flooding in your community? Learn more about why and how flooding occurs, your risk of flooding, and what you can do to reduce your flood risk.

GUIDE YOUR SEARCH

Not sure where to start? Answer five short questions and receive a curated list of mitigation options recommended for your property.

CONNECT YOU TO RESOURCES

ReduceFloodRisk.org features flood mitigation information from federal agencies and other organizations you can trust to help you protect your biggest investment.

ANSWER YOUR QUESTIONS

Still haven't found what you're looking for? Check out our Resources section where we have answered a number of FAQs, have information on financial assistance options, and help connect you with professionals who may be able to offer further assistance.
