ASFPM Mapping and Engineering Standards Committee
Annual Status Report

MARIA COX LAMM AND BROOKE SEYMOUR
CO-CHAIRS
Introduction

The primary mission of the Mapping and Engineering Standards Committee is to provide policy guidance and support for floodplain mapping and engineering issues aiming to reduce future losses, costs and human suffering caused by flooding. Historically, this committee has had major impacts on FEMA’s Flood Mapping Program, requirements for map modernization, Risk MAP and the National Flood Mapping Program and addressing technical issues related to flood hazards such as levees and dams.

A subcommittee of Mapping and Engineering Standards focuses on the Cooperating Technical Partner program. This subcommittee is co-chaired by Joanna Rohlf with the Kansas Department of Agriculture and Dave Guignet with the Maryland Department of the Environment. The goal is to help identify mechanisms to measure successes and share best practices among mapping partners.

Key Accomplishments

The Mapping and Engineering Standards (M&ES) committee has accomplished the following:

Reviewed FEMA’s fall 2023 Guidelines and Standards Update and hosted a FEMA webinar on the proposed updates for our members. FEMA maintains standards and guidance on an annual basis to support the National Flood Mapping Program. These updates are generally released in July for review and comment and go into effect by the end of the year. When the notices are received from FEMA, the M&ES Committee distributes the notice and solicits comments from its membership.

Participated in two FEMA Operating Partners meetings to resolve technical and policy issues related to the National Flood Mapping Program. (Over the past several years, the ME&S Committee had been working to get these important FEMA Operating Partners meetings back in place.)

Participated in the Technical Mapping Advisory Council and provided input to FEMA regarding National Flood Mapping Program metrics, implementation, policies and products, including future conditions and the impacts of climate change, including how the program can improve equity.

Participated in the cross-committee Climate Change Webinar on March 8, 2024.

The CTP subcommittee facilitated the exchange of information through the following webinars:

- FEMA 2D Modeling integrated Planning Team – May 7, 2024
- Planning for Flood Resilience: Integrating Hazard Mitigation and Flood Management Planning – February 21, 2024
- FEMA’s Future of Flood Risk Data Initiative – November 29, 2023
- Base Level Engineering Using the Data for Floodplain Management – September 26, 2023
- FFRMS Implementing EO 13690 & State BFE +1, 2, and 3 Risk Assessments – June 28, 2023

Recordings of past CTP webinars are available online through the [CTP Information Exchange](#).
Priorities

- Continue to participate in partnership meetings, such as Operating Partners and TMAC, to improve the National Flood Mapping Program.
- Work with FEMA and Congress to encourage further development of the CTP program.
- Continue to offer information exchange webinars on issues related to CTPs.
- Work to further the guidance and standards regarding 2D Floodways and the overall floodway concept.
- Work with FEMA to address concerns about Automated Map Production and Risk Rating 2.0.
- Work with FEMA to support and inform the Future of Flood Risk Data.

Recommended Actions

- Use Operating Partners meetings to further committee goals, provide direct programmatic feedback to FEMA HQ, and resolve technical and policy issues raised within the ASFPM membership.
- Engage committee members to review information and recommendations that arise from the TMAC committee.
- Organize and facilitate regular calls and outreach with CTP subcommittee and general committee membership. Coordination and collaboration with ASFPM Flood Science Center, FEMA CTP Program Coordinator, and FEMA CTP Community of Practice (CoP).
- Conceive, develop, and present webinars on topics relevant and beneficial to CTPs that support capacity building.
- Review ongoing federal policy and rulemaking activities, including proposed federal mapping appropriations and FEMA Guidelines and Standards updates. Coordinate with other ASFPM committees as appropriate. Provide input and comments on issues that are relevant to the committee mission.
- Prepare for the national policy meeting and lead discussions at the annual committee meeting. Prepare agenda lineup of topics and speakers; and prepare notes of annual committee meeting for distribution to the committee members and/or posting on the website. Lead discussions at the annual CTP subcommittee meeting and coordinate logistics on a CTP social event at the annual conference.
- Organize, facilitate and complete action items associated with quarterly group conference calls.
- Explore social media options for communicating with committee members and work to identify a committee member as a webmaster. Maintenance and update of the M&ES Committee ASFPM webpage.
