Memo

To: ASFPM Climate Change Taskforce
From: Bob Freitag
Date: January 20th 2023 Call

Here are our notes from our January 20th Zoom call. Link to call. In attendance were:

First	Last	Email
Alan	Lulloff	alan@floods.org
Bob	Freitag	bfreitag@UW.EDU
Darryl	Hatheway	darryl.hatheway@aecom.com
Dave	Carlton	Dave Carlton <dave@dkcarlton.com>
Eugene	Henry	elachenry@hotmail.com
Kristen	Gelino	kgelino@gmail.com
Niki L	Pace	nlpace@lsu.edu
Shanna	Udvardy	sudvardy@ucsusa.org
Stephen	Veith	stephen.g.veith@gmail.com
Valerie	Swick	vswick@usbr.gov

Agenda: Over a Zoom call, we discussed the following items. Click here for the recording.

- Co-Chairs Webinar – Bill and Bob
- HAZUS – Webinar -- Stephen
- Using the Climate Change Taskforce Google site – Niki

Co-Chair Webinar - The objective is to help ASFPM committees integrate climate change concerns into their work programs and to acknowledge interdependencies.

The webinar would include a panel of representatives from the following committees.

1. Social justice
2. Mapping
3. Coastal
4. Natural beneficial function
5. Regulation.

Tentative Date: Friday, March 3rd

Alternative formats discussed. Bill will determine the actual format with input from

Committee chairs. Preferred items are underlined

1. Panel presentations/discussion through chat / Taskforce member filter chat

2. Panel presentations/break groups
    a. Pre-arranged / with an assigned Taskforce facilitator
    b. Random / with an assigned Taskforce facilitator
    c. Breakout groups will be arranged by Committee / with a facilitator.

3. Time – 15 minutes / Co-chair / one question following each presentation / 15 minutes to address questions from chat
4. Use breakout group software with virtual sticky posts

5. Panel topics
    a. Committee purpose or role in ASFPM
    b. Climate change challenges
    c. Climate questions.

6. Develop a White paper from issues gleaned from the webinar

HAZUS Webinar – Objective to provide ways HAZUS can address changing hazards within the context of changing communities. Future conditions estimates

.

HAZUS very linear.

Stephen has identified several users that could help present.

Format could include three presentations each 30 minutes

1. Current problems with addressing future conditions. Bob could present Troy Beach presentation
2. Addressing problems
3. Showcase existing tools within HAZUS.

Webinar could target

1. Modelers
2. Those that rely on / use the products.

Ideas

1. ASFPM has a monthly Webinar. ASFPM could sponsor Webinar – Alan will look into it.
2. HAZUS scenario could reflect futures
3. HAZUS could use the Comprehensive / FLUM, as an inventory layer.

4. Stephen could provide some case studies. Could use existing SLR NOAA date, a community FLUM with a HAZUS Level 1 run. ASFPM may have some funds. -- Alan will look into it.

Please contact Bob if you would like to help Stephen. Members of the committee include Darryl, Bob, and Alan.

Climate Library – This will be addressed at our February meeting. Niki

Date February 17th, 9: 00 PST. Click here to attend.
